PROFESSIONAL SUMMARY

Computer Science undergraduate (GPA: 8.7) with a strong, self-driven foundation in SOC operations, threat detection, and incident response, built through structured training on TryHackMe and independent blue team projects. Currently advancing through the SOC Level 1 (SAL1) track while applying SIEM, log analysis, and MITRE ATT&CK concepts in hands-on labs. Demonstrated initiative by building and documenting original security projects beyond guided coursework, including a Python-based network scanner and Wireshark-based traffic analysis. Seeking a SOC Analyst internship to bring this practical, hands-on foundation into a live security operations environment.

CORE COMPETENCIES & TECHNICAL SKILLS

SOC & Threat Hunting: Log Analysis, Incident Response, Threat Detection, SOAR Workflows, EDR

SIEM & Networking: Splunk, Elastic Stack (ELK), Wireshark, Network Traffic Analysis, TCP/IP, IDS/IPS

Programming & OS: Python (OOPs, File Handling, Scapy), Bash Scripting, Kali Linux (Primary OS), Windows

Frameworks & Theory: MITRE ATT&CK Framework, Cyber Kill Chain, Vulnerability Management

PRACTICAL SECURITY PROJECTS

Home Network Scanner | Python, Scapy **2026**

- Designed and built a custom network scanning tool using Scapy to actively discover live hosts on a local network.
- Applied host-discovery methodology used in real-world network reconnaissance and defensive monitoring.

Network Traffic Analysis | Wireshark **2026**

- Captured and investigated live network packets using Wireshark to analyze traffic flow and identify protocols.
- Identified anomalous traffic patterns relevant to intrusion detection and flagged deviations from normal behavior.

SIEM Learning Lab | TryHackMe **2026**

- Practiced end-to-end log monitoring, alert triage, and incident investigation workflows in a simulated SOC environment.
- Applied SIEM correlation concepts to distinguish genuine threats from false positives.

CERTIFICATIONS & TRAINING

Google Cybersecurity Professional Certificate — Coursera
Completed

Cybersecurity Trainee — TryHackMe **Jan 2026 – Present**

- Pursuing SOC Level 1 (SAL1) Path with focus on threat hunting and endpoint security.
- Completed Cyber Security 101 & Pre Security paths covering networking, attack methodologies, and SOC fundamentals.
- Hands-on experience with Wireshark, Nmap, TCPDump, Linux, Windows, and network traffic analysis.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science **Aug 2024 – Sep 2028**
Bikaner Technical University (BTU) *Rajasthan, India*
